ABOUT ME

I am a 25-year-old student with a lot of customer experience. I am a conscientious and responsible person with a positive attitude. I have a driving force where I constantly work to improve myself as a person and in what I work with. I have a good eye for detail and see what needs to be done.

I chose Frontend Development as I am passionate about creativity and structure. I have found this possible to utilize in creating good user designs and writing semantic code. I enjoy both design and development, and am therefore very flexible. With the right guidance, Fullstack is an attractive profession to develop towards.

I am humble and have no problem acknowledging mistakes or potential for improvement, and constructive criticism is well received. I can work well independently in the home office, at the same time as I enjoy working with others. The most important thing for me is a friendly environment with development potential.

WORK EXPERIENCE

2021 - Present	Hurtigruten Group Working as a Frontend Developer at Hurtigruten Group for their B2B team. We use React with TypeScript and libraries like Redux. For styling we use MaterialUI and JSS.	Oslo
